## Adobe Training with QA

Adobe Creative Suite (CS) is a software pack that includes a wealth of programs for those who want to “tap” into their creative side. QA offers training in the most popular CS programs: Photoshop, Illustrator, InDesign, Dreamweaver and Acrobat.

Adobe training courses are intended for (but not restricted to) those involved in web, print or graphic design, marketing communications and even those who may desire a career change or the ability to create remarkable design work. QA offers training in Adobe’s CS5 and CS6 most popular programs at beginner and advanced level. These training courses will help prepare delegates to take the Adobe Certified Associate (ACA) examination or those studying towards the Adobe Certified Expert (ACE) certifications.

# Adobe InDesign

## (QAIDINTC)

This two day introduction covers some of the basic and more commonly used features of Adobe InDesign so that attendees can navigate the software and use InDesign's tools to create well-designed professional documents.

In this course you will learn how to use paragraph and character styles that allow you to format pages of text uniformly, layout features that help you to build alternate size configurations of your document, and various panels that enable you to easily customise both text and graphics.

This course is suitable for anyone using InDesign CS5, CS6 or CC. If attending in a QA centre then the course will be delivered using InDesign CS6.

Adobe InDesign provides professional-grade page layout and design tools for the production of high quality documents for use in both print and digital media.

## Adobe Photoshop

(QAPSINTC)

This introduction course covers some of the basic and more commonly used features of Adobe Photoshop so that attendees can navigate the software and use Photoshop's tools to work with digital images. In addition, an orientation of Adobe Bridge and organisation and management of digital assets using Bridge is covered.

Photoshop is used by a variety of professionals, from marketing departments and organisations, from photographers to designers, with this introduction course focusing primarily on the photography component.

## Adobe Photoshop Advanced

(QAPSADVVC)

This course delves into some of the more advanced image editing and manipulation techniques that are used by Photoshop experts, and offers you hands-on activities that demonstrate how these techniques can be used in order to create exciting, professional visual effects. It will also cover powerful tools and techniques to automate aspects of your Photoshop workflow.

These courses are suitable for anyone using Photoshop CS5, CS6 or CC. If attending in a QA centre then the course will be delivered using Photoshop CS6.

# Adobe Illustrator Introduction

(QAILINTC)

This introductory course covers some of the basic and more commonly used features of Adobe Illustrator, so that delegates can navigate the software and use Illustrator's tools to create and work with vector graphics.

# Adobe Illustrator Advanced

(QAILADVC)

This one-day advanced course will cover some of Adobe Illustrator's more advanced artwork creation tools and techniques. You will learn how to create more complex shapes and graphics, work with symbols and with masking. The course will also cover how to convert raster graphics into vectors, how to apply effects and how to work in perspective.

These courses are suitable for anyone using Illustrator CS5, CS6 or CC. If attending in a QA centre then the course will be delivered using Illustrator CS6. Delegates do not need any experience of using Adobe Illustrator as all required skills will be covered during the course.

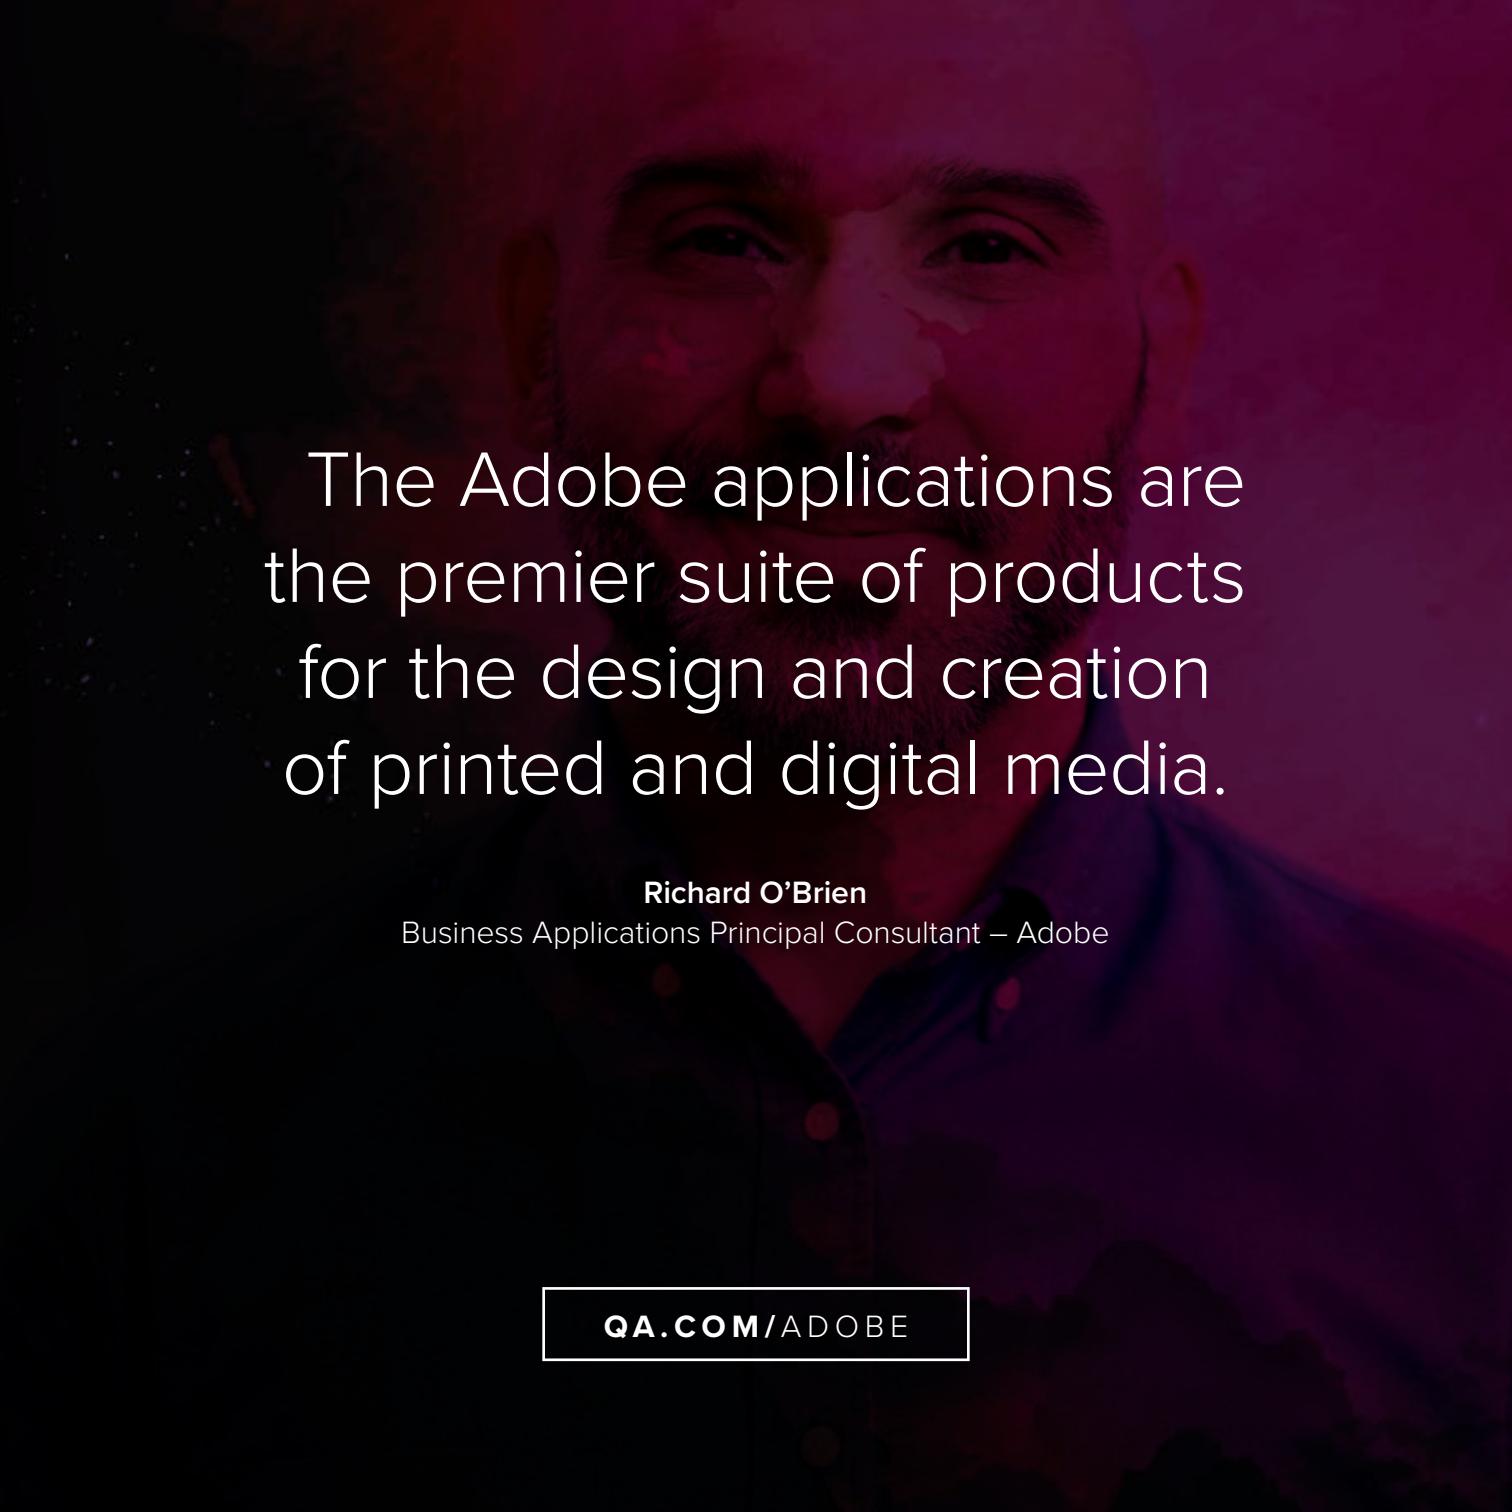

Adobe Illustrator provides industry-leading tools for the creation of vector artwork.

# Adobe Suite Masterclass (QAADMC)

This five-day masterclass covers all of the most commonly used features of the three main products in the Adobe suite - Photoshop, Illustrator and InDesign - used to produce printed documents. Whether the aim is to produce flyers, adverts, brochures or tender documents then this course teaches all of the key skills required.

The course will be taught using the Adobe Creative Suite (CS6), but is suitable for those using CS5, CS6 or Creative Cloud.

# Adobe Dreamweaver

Adobe Dreamweaver  
CS5 (ADDWCS5L1)  
CS6 (ADDWCS6L1)

## Level One

This course is designed for novice web designers, web developers, website designers, and graphic artists with some programming background who need to build simple websites and want to utilise the features of Adobe Dreamweaver. The course covers the Adobe Web Communication using Dreamweaver objectives and can be used to help prepare students to take the Adobe Certified Associate (ACA) exam.

Adobe Dreamweaver  
CS5 (ADDWCS5L2)  
CS6 (ADDWCS6L2)

## Level Two

You are familiar with creating web pages and now you will enhance the web pages by adding advanced functions such as navigational controls, media elements, and forms. Also, it is essential to ensure that your websites are compatible with various modern day display devices such as mobile phones, tablets, and smartphones. In this course, you will create fluid CSS layouts, implement mobile integration techniques, and share files over a server to work in a collaborative manner.

Adobe Dreamweaver provides the Web designer with all the tools they're likely to need to produce stunning, quality websites.

[QA.COM/ADOBE](http://QA.COM/ADOBE)

Training that goes beyond our courses. There is no reason why learning with our experts is limited to our classroom. Our trainers ensure that our delegates get the best possible service before they arrive and after they leave.

## Why QA for Adobe training?

### 1. We are experienced

We deliver more than 100 Adobe course events every year.

### 2. We train on the real tools of the trade

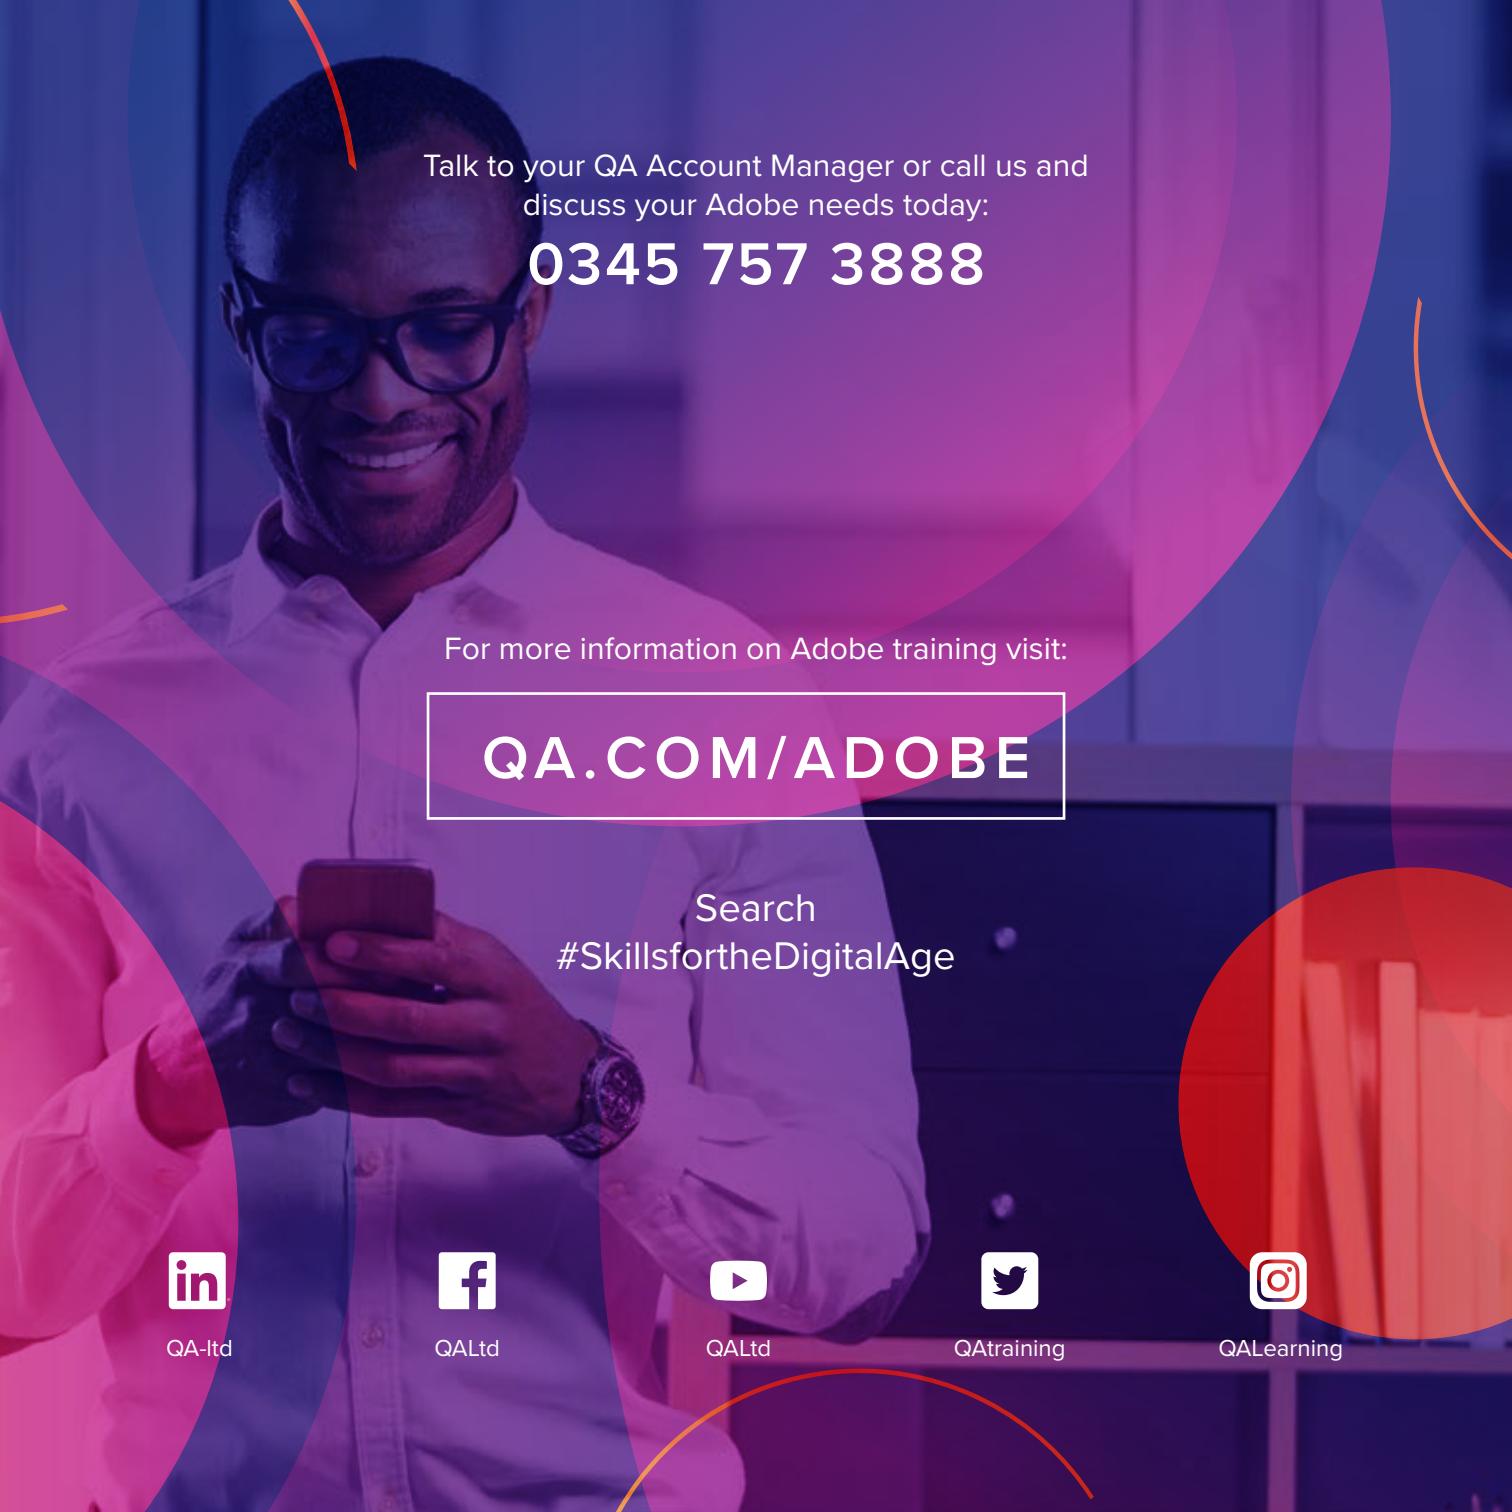

Our Adobe courses can be taught on both PC and Mac platforms, so you can learn on the same system you use outside of the classroom.

### 3. We have leading expertise

Our trainers hold a range of professional memberships and qualifications including Adobe Certified Experts (ACE) and Associates (ACA).

### 4. We can train nationwide

Our training centres span the whole of the UK, so you can learn from a location convenient for you. We can also provide Adobe training using our innovative Attend From Anywhere option.
