Convenient & Flexible Learning Options

Instructor-led Classroom
Join an AWS course at one of our nationwide training centres for an interactive, hands-on learning experience.

Attend from Anywhere
Can't make it to a training centre? You can join the class virtually from the comfort of your own home or office, without losing the classroom experience.

On-site Courses
If you have a team to train, QA can come to your company's office or site of your choice to deliver the course you need.

- **AWS Technical Essentials:** Technical end users learn basic fundamentals to make informed IT solutions-based business decisions.

- **AWS Business Essentials:** Decision makers learn benefits of cloud computing and how a cloud strategy can help meet business objectives.

- **Architecting on AWS:** Learn best practices and how to optimise and leverage AWS services.

- **Advanced Architecting on AWS:** Learn to build complex solutions that incorporate data services, governance and security.

- **System Operations on AWS:** Learn to create automatable and repeatable deployments of networks and systems.

- **DevOps Engineering on AWS:** Learn the DevOps methodology and common patterns to develop and deploy applications.

- **Developing on AWS:** Learn to design and build secure, reliable, scalable AWS-based applications.

- **Big Data on AWS:** Learn how to use Amazon's big data solution and leverage best practices to design big data environments.

- **AWS Accelerated course:** For experienced AWS users, delegates will learn best practices and how to optimise and leverage AWS services and how to build complex solutions that incorporate data services, governance and security.

- **Security Operations on AWS:** Learn how to efficiently use AWS security services to stay secure and compliant in the AWS Ccs cloud.

- **Data Warehousing on AWS:** Learn concepts, strategies, and best practices for designing a cloud-based data warehousing solution using Amazon Redshift, the petabyte-scale data warehouse in AWS.

- **Migrating to AWS:** Learn how to plan and migrate existing workloads on to AWS Cloud. You will also cover migration strategies with a detailed discussion on each phase of the migration process.
