

TRAINING FOR EVERY

**BUSINESS**  
**NEED.**

QA

## Cloud Computing

Training courses for individuals or companies wherever you are in your cloud journey.

## Cyber Security

The most comprehensive Cyber Security training portfolio, providing training for the whole of your organisation.

## App & Web Development

From developing 'micro-experiences' to highly personalised apps, at QA we're happy to help you write code like poetry.

## IT Systems

Enterprise technology, infrastructure and hardcore technical training, at QA we have it covered.

## DevOps Tools & Culture

Our trainers know how to help you develop an effective DevOps culture as well as how to use the tools.

## Project Management

From foundation to specialist, we've got all the training you need for Project and Programme Management.

## Office Applications

Get the most out of your Office Applications, from Microsoft to Adobe, including latest releases and updates.

## Service Management

Maximise the quality of your IT services and develop competency and capability in service management best practice.

## Leadership & Management

Increase awareness of, and access to a wider range of leadership styles and improve understanding of the impact of behaviour on others.

## Business Analysis

With the latest Diplomas and Certification paths to certificates, learn the most effective techniques that really work in an agile world.

## Business Skills

Develop core communication, relationship and customer service skills.

## CRM & Sales Performance

Improve your sales contribution through technology and business techniques.
