CompTIA

CompTIA are a world-leading trade association for the IT industry. They create exams (and now their own content) for 13 vendor neutral, highly sought after certifications, ranging from IT and Cloud Fundamentals through to Advanced Security Practitioner. QA offer more dates on more of these courses than any other provider.

Technical Certifications

CompTIA ITF+ (COMITFUND)

This 3-day course is intended for those wishing to qualify with CompTIA IT Fundamentals Certification. CompTIA Information Technology (IT) Fundamentals Certification is the essential qualification for beginning a career in PC support.

CompTIA A+ (COMAE19 and COMAP19)

These courses prepare delegates for the CompTIA A+ certification exams. CompTIA A+ is a foundation certification in IT for support and operational roles.

CompTIA Network+ (COMNW18)

CompTIA Network+ is the first certification IT professionals specializing in network administration and support should earn. Network+ is aimed at IT professionals with job roles such as network administrator, network technician, network installer, help desk technician and IT cable installer.

CompTIA Cloud+ (COMCLOUD18)

This course is designed for IT professionals who wish to develop cloud computing skills to enable them to move IT workloads to the cloud and integrate products and services from different providers and industries.

Certification in a Box

Certification in a Box programmes contain everything you need to become certified, all for one outstanding price. The bundles include items such as self-paced learning kits, classroom training courses, practice tests and examinations.

Available for:
• CompTIA A+
• CompTIA Network+
• CompTIA Security+

Cyber Certifications

CompTIA Security+, CompTIA Cybersecurity Analyst (CySA+), CompTIA PenTest+ and CompTIA Advanced Security Practitioner (CASP+), from the CompTIA Cybersecurity Career Pathway, help technical specialists achieve cybersecurity mastery, from beginning to end.

CompTIA Security+ (COMSEC17)

This course is aimed at IT professionals with job roles such as security architect, security engineer, security consultant/specialist, information assurance technician, security administrator, systems administrator, and network administrator. It teaches the fundamental principles of installing and configuring cybersecurity controls and participating in incident response and risk mitigation. This course will help delegates prepare for exam SY0-501.

CompTIA CySA+ (COMCYSA)

Designed specifically for experienced information security professionals preparing to take the CySA+ exam, this course can helps prepare delegates for the CompTIA CySA+ certification exam with hands-on, scenario-based training, so they'll be ready to meet Advanced Persistent Threats (APTs) head on.

CompTIA PenTest+ (COMPENT)

This course is designed for IT professionals who want to develop penetration testing skills to enable them to identify information system vulnerabilities and effective remediation techniques for those vulnerabilities. In particular, students who also need practical recommendations for action to properly protect information systems and their contents. This course is also designed for individuals who are preparing to take the CompTIA PenTest+ certification exam PT0-001, or who plan to use the PenTest+ as the foundation for more advanced security certifications or career roles.

CompTIA Advanced Security Practitioner (COMPCASP)

This course prepares delegates for the CompTIA Advanced Security Practitioner exam. The course covers advanced information security principles. Delegates will learn how to apply critical thinking and judgement across a broad spectrum of security disciplines to propose and implement sustainable security solutions.
