

The G2G3 DevOps Simulation

EXPERIENCE THE DEVOPS DIFFERENCE

Any successful DevOps implementation depends on people.

With over 50% of large IT enterprises using, or intending to use, a DevOps approach in the next year, less than half of those already using DevOps report any level of success. When asked to identify the biggest obstacle to adopting DevOps, most cite “**people**” challenges — as opposed to process, technology or information — as the greatest issue.*

How much have you invested in new tools and processes?

How much have you invested in your people?

The best way to clearly communicate the DevOps case for change is:

The G2G3 DevOps Simulation

The G2G3 DevOps Simulation is a highly interactive experiential learning workshop which demonstrates the business value and positive impact of a DevOps approach.

Benefits of the DevOps Simulation

- Accelerates adoption of DevOps across the enterprise
 - Turns DevOps opponents into advocates
 - Clearly communicates the DevOps case for change
 - Accelerates a positive DevOps culture
- Creates shared understanding for Development and Operations around how to work together as a high performing cross-functional team
 - Provides new practices that can be executed with immediate effect.

The G2G3 DevOps Simulation

EXPERIENCE THE DEVOPS DIFFERENCE

How it works

The G2G3 DevOps simulation experience is a half-day, role based workshop, focused on the software development and deployment lifecycle. The simulation is highly realistic, and leverages game dynamics to empower cross-functional teams with a shared vision of successful DevOps practices.

Participants from a variety of disciplines (Business, Development, Test, QA and Operations) are immersed into a simulated environment whereby they are challenged to release new products whilst internal and external forces continually change. This realistic approach delivers a level of tension and excitement that creates an 'a-ha' moment for all involved.

Who will benefit?

The G2G3 DevOps simulation is suitable for:

- Executive buy-in to DevOps initiatives
- Engaging Development Teams
- Engaging those involved in Service, Process & Integration roles
- Engaging Operations
- Engaging the wider business
- For tool and services vendors promoting DevOps solution.

Round 1 Chaos

Participants are quickly immersed into a real-life complex application development scenario. Chaos ensues, with poor communication and a lack of collaboration resulting in poor business results, higher development costs, longer testing times and more. As a result, opportunities are lost and revenues are negatively impacted. Following the first round, a review is facilitated to identify the issues and to discuss how a DevOps approach could drive improvement.

Round 2 Improved

Round 2 builds upon the learning outcomes from the previous round and introduces processes such as Service Virtualization, Minimum Viable Product iterations, Fail Faster and more. This drives maturity and empowers the teams towards automation, building a more collaborative culture, and ultimately improved business results.

Round 3 Optimised

Building on the learning outcomes of Round 1 and 2, participants learn that instilling a DevOps culture is key to achieving operational excellence. Participants experience a pronounced shift in the reduction of development times and the number of errors each application had before reaching operations. Through collaboration, streamlining, automation and repeatable practices, participants realize improved ROI and optimized business results.
