OVERVIEW

QA already works on a private basis with many of the world's leading organisations to shape and develop their graduate intake. So we have a deep understanding of how to develop the fantastic raw talent that motivated young individuals bring to an organisation.

QA is uniquely placed in the UK learning sector to understand the skill shortage facing organisations and so we have developed two graduate intake programmes: The Digital Product Developer (DPD) and the Digital Product Owner (DPO); available in a choice of two convenient ways of learning. This means we are now able to bring this experience to you in a public and mixed organisation programme, offering unrivalled value for money.

4 WEEK FAST TRACK

The Fast Track programme delivers a short, intensive blast of knowledge over a four-week release followed by further study every twelve weeks.

DIGITAL PRODUCT DEVELOPER - FAST TRACK QADPDGFT	DIGITAL PRODUCT OWNER - FAST TRACK QADPOGFT

12 WEEK WORK RELEASE

The Work Release method delivers the skills from the Fast Track but dispurses the learning over longer period. Whilst still covered within four learning weeks, they are spread out, with each full week of study being delivered in consecutive months. This is then followed by further study every twelve weeks.

DIGITAL PRODUCT DEVELOPER - WORK RELEASE QADPDGWR	DIGITAL PRODUCT OWNER - WORK RELEASE QADPOGWR

OVERVIEW

DIGITAL PRODUCT DEVELOPER

The Digital Product Developer programme focuses on the technical skills individuals and organisations need to succeed. Whilst the course focuses on software skills and the key role these skills have in development, a number of business skills are also explored, to bridge the gap between developers and other members within work projects.

WEEK 1	WEEK 2	WEEK 3	WEEK 4
Team Building Introducing Agile Agile Working Web Development	Git Foundations Java Foundations Java Object Orientated Java Test Driven Design (TDD)	Java Java and Spring	Case Study /Project work, Present with Impact, Final Presentation

DIGITAL PRODUCT OWNER

The Digital Product Owner programme is designed to build a technically savvy project manager and owner, focusing on driving innovative thinking and metric driven transformation within a business. There are a number of key skills that are covered in the DPO programme, including a comprehensive understanding of Agile methodology, focusing on its use in target-focused, business objectives. Plus the management of projects using PRINCE2 and a variety of soft skill segments.

WEEK 1	WEEK 2	WEEK 3	WEEK 4
Team Building Case Study Introducing Agile Agile Working User Focused Analysis The Digital Roadmap	Business Analysis Agile Product Ownership	PRINCE2 Foundation Leading User Focused Analysis Digital Services	Case Studies PRINCE2 Final Exam

BENEFITS

Fully Packaged
QA take on the design & scheduling

Best Value
Save L&D time and money without compromising quality

Top Quality Content
Designed & authored by QA's award winning SMEs

Top Quality Delivery
Delivered in QA's own fantastic facilities

Convenient for You
Set schedule (rolling programme start dates)

Mix of Learning Modes
Classroom, self-paced, On-line learning and more

Industry Interactions
Invaluable interactions with graduates from other companies

Good Learning Outcomes
New graduates hit ground running

Plus, Ignite graduates benefit from a **20% discount on future training** with QA during their employment with your company.

PROGRAMME FUNDAMENTALS

START WITH THE FOUNDATIONS

QA offer two forms of programme: the 4-week Fast Track and the 12-week Work Release. Whether graduates take the Digital Product Owner or Developer programme, the material covered in each programme is identical and focuses on case study driven approaches and current working practices. At the end of each foundation programme the groups work together as a team to demonstrate what they have achieved.

EXPLORE STRENGTHS AND HELP MITIGATE WEAKNESSES

At the end of the foundation programme, a Learning Advisor will work with you and your graduate directly to review progress and start their ongoing journey giving guidance on where their strengths lie.

Each graduate will be required to demonstrate progress in key areas to show that they are continuing to develop their skills by building a portfolio of work.

MAXIMISE POTENTIAL

Every three months your graduate will meet with their Learning Advisor and work with both you and them to continue to develop and train them. Each quarter we will suggest and provide up to five training days from QA's extensive learning catalogue to help you find the best way to develop your Graduates, be that through cutting edge skills or industry leading qualifications.

DEMONSTRATE SUCCESS

To become a QA Ignite Graduate, your team member will have attended at least 30 instructor led contact days and developed a significant portfolio of work demonstrating what they have achieved. As an alumnus from our graduate learning programme, they will be entitled to a discount on all further training with QA for as long as they remain in your employ. (T&C's apply)
