

Microsoft Learning as a Service

Learning as a Service is a cloud based solution which delivers your Microsoft Curriculum learning needs all in one place.

What is Learning as a Service?

Learning as a Service is a cloud based solution which delivers your Microsoft Curriculum learning all in one place.

How it works

Learners will be provided with 12 months' access to the entire course catalogue which includes over 200 official Microsoft curriculum courses. The self-paced online learning utilizes a wide range of media including text, instructional videos, demonstrations, end of module reviews and downloadable resources such as e-Books. Learning as a Service offers a range of labs to enable the learner to gain practical, hands-on skills by using the Microsoft products. This provides a safe place for learners to practice their new skills, giving them the confidence to increase performance in their role.

What courses are included?

Learning as a Service courses are being regularly updated to ensure learning stays on top of any innovation or changes to the technology. There are over 200 courses to choose from, key topics include:

Big Data and Analytics

Azure (including Azure application development, Administration, Architecture, Security, DevOps and Azure data and AI tools)

Programming

Microsoft SQL Server and Database technologies

Microsoft Cloud technologies (including Office 365 and Dynamics 365)

Modern Desktop (Windows 10)

Learning as a Service

QA & Microsoft Blended Learning Solutions
