

ONLINE ACADEMIES

**A NEW WAY IN
DIGITAL
LEARNING.**

QA

Digital learning for the digital age.

We know the world's becoming ever more digital and businesses need to adapt quickly if they want to succeed.

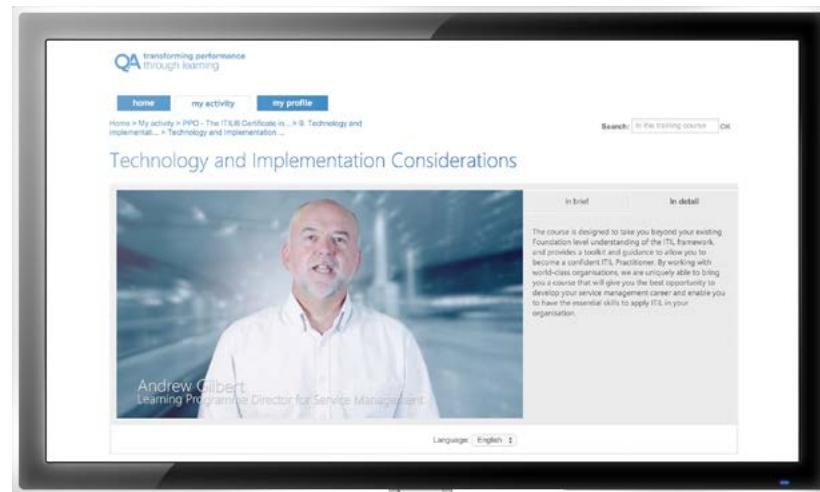

Driven by more demanding customers and ever-changing technology, the ability to adapt is reliant on skilled workforces delivering change at an unprecedented rate.

That's where QA's powerful new online learning solution can help.

ONLINE ACADEMIES

The place for professionals to learn.

Do you need to create qualified professionals in your business?

With QA's Online Academies you can start today. Offering instant access to fully accredited certifications across a range of professional courses, it's the ideal way for individuals and teams to get qualified.

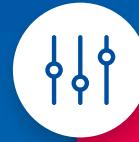

Delivered by our industry-leading experts and created exclusively for digital learning, QA Online Academy courses deliver maximum business impact with minimum disruption.

Skills for today's professionals.

Building unbeatable teams needs much more than just a shelf full of certificates.

A team (or individual) enrolled in a QA Online Academy gets a consistent set of top quality courses and learning materials that lead to qualifications in the most important skills for modern business.

And once they've achieved the qualification, they can keep their knowledge and skills up to date with ongoing access to the Academies' discussion boards.

Disruption-free skills development

Developing large teams is hard. It's hard to schedule in the time for everyone's training, and even harder to know the whole team has reached the same level of understanding.

By using a consistent video-based digital learning course written by QA's expert trainers, you can be certain that every team member is getting exactly the same benefit and experience from their training.

Our self-paced courses also make scheduling a breeze and the reports make it easy for managers to keep an eye on how things are going.

Benefits for organisations:

Effortless deployment to an individual, a team or an entire workforce.

Video-based learning ensures a consistent experience for all learners.

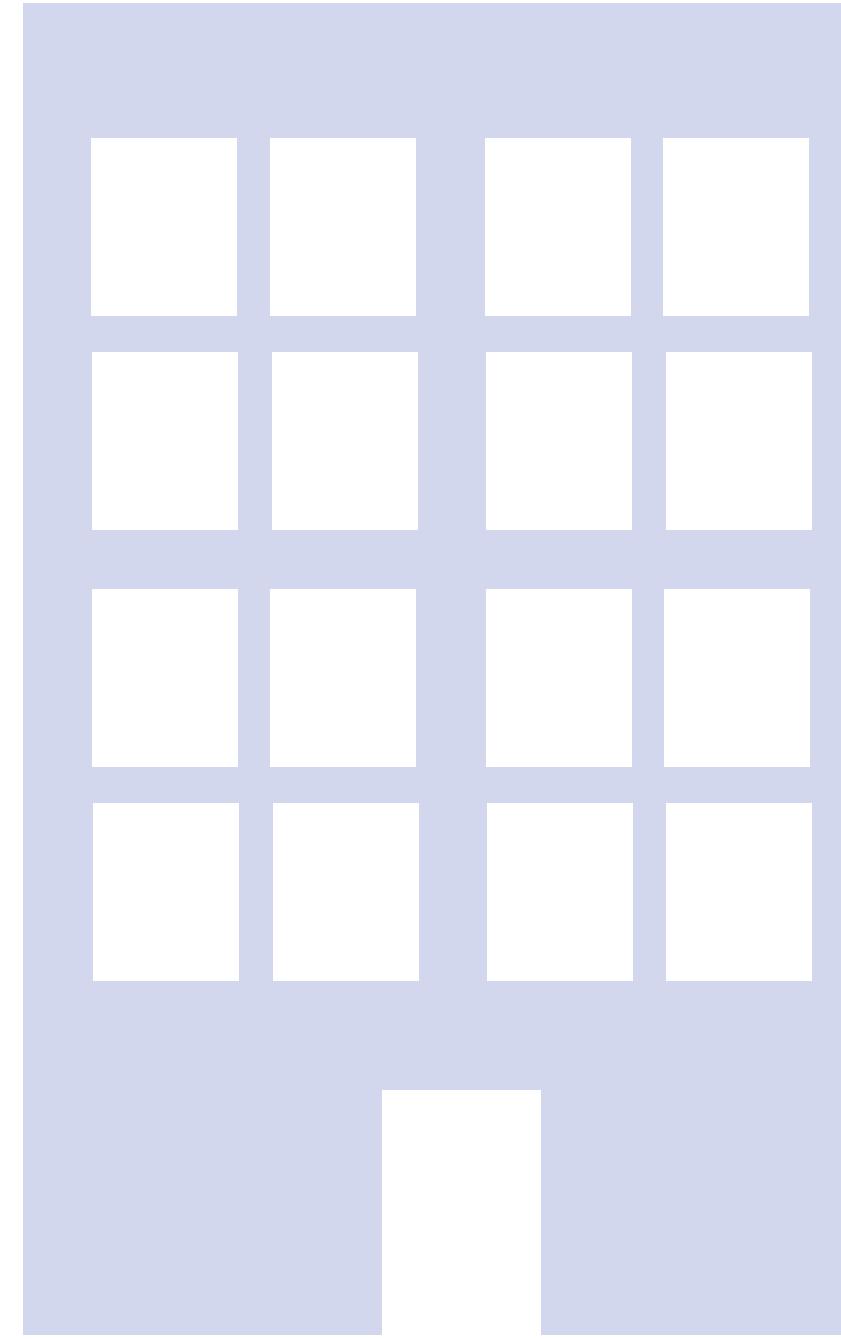

The same high quality learning experience as QA's classroom courses.

Bespoke learning content can be created for each organisation. Have your own e-learning? Need a custom course created? Want to mix in some on-site training?

We can get it done.

QA Online Academy can be 'blended' with other QA learning methods such as our Virtual Classroom and Face-to-face Classroom events.

Managers can generate reports to see uptake, ROI and to keep an eye on how things are going.

Get qualified while doing your day job

As an individual it can be hard to fit in skills development around the demands of the day job.

QA Online Academy is available whenever it's needed. Delegates can log in and learn at work, at home, or on tablets or mobiles. Courses are broken down into bitesize modules, so it's easy to do just ten minutes in a break, or work through an entire topic when there is more time.

And of course, each individual's 'myQA' account will remember what they've learnt and help them jump right back into their course.

Benefits for individuals:

Instant access lets you learn when you want to.

Bitesize, modular courses help you fit learning in to your schedule.

Video and activity based digital learning means you can work at your own pace.

Access your learning from anywhere you have an internet connection and carry straight on from where you left off.

Make use of the Academies discussion boards to improve your skills, solve problems and keep up to date with changes.

Powered by QA's learning expertise

You need more than technology to provide great learning.

However whizzy the website, learning is only as good as the content. So we've brought over 30 years of expertise in classroom learning into the digital world.

Our experienced trainers have crafted unique learning experiences for the Academy, and deliver them personally via video and in our online discussion boards.

And that's not all.

For **bespoke programmes** we can also create blended solutions that include virtual classrooms with live instructors to give companies even more choice of how to learn.

EXPERTLY WRITTEN

Our Academy courses are written by our own subject experts, giving you the same top-quality learning experience as our classroom courses.

EXPERTLY DELIVERED

We don't use actors in our Academy learning. Our experienced classroom trainers deliver every element themselves, making sure that every detail is just right.

DESIGNED FOR DIGITAL

These courses are written specifically to make best use of the digital platform, using video, slides, knowledge checks and activities to help you learn.

THERE TO SUPPORT YOU

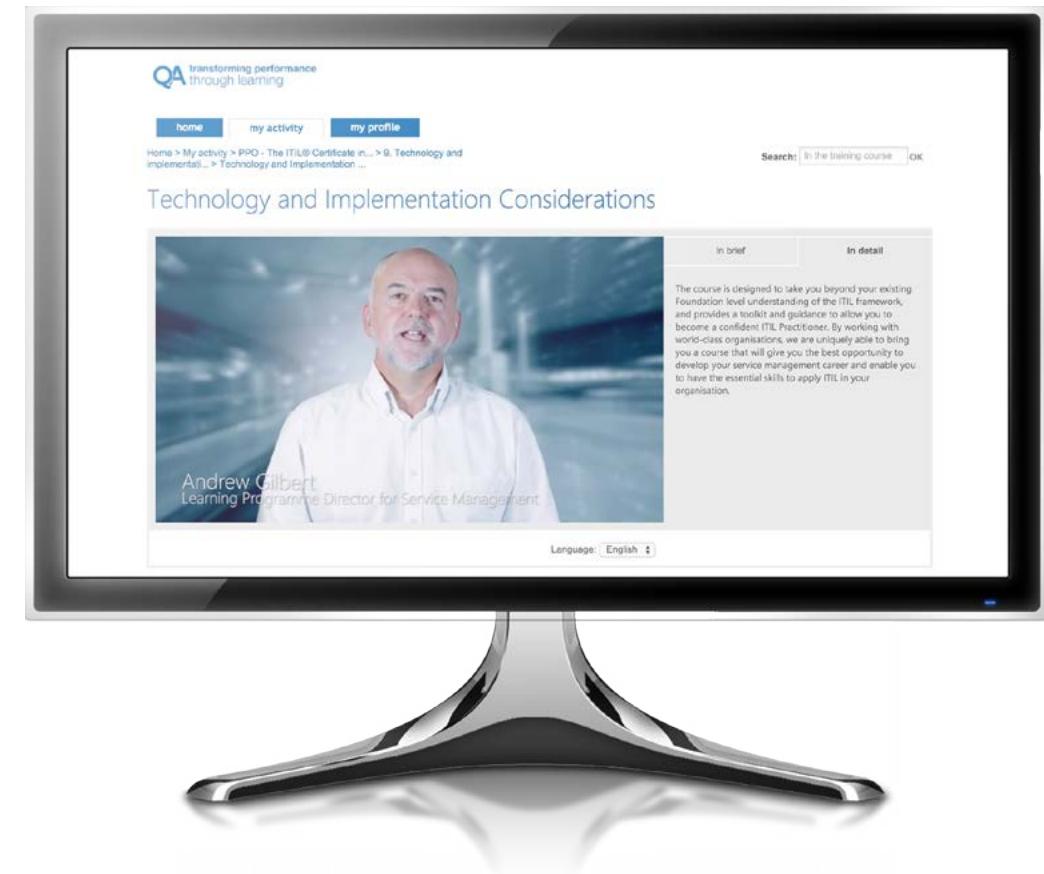

Many of our courses come with tutor support, offering you expert advice and mentoring while you gain confidence back in the workplace.

A better learning experience

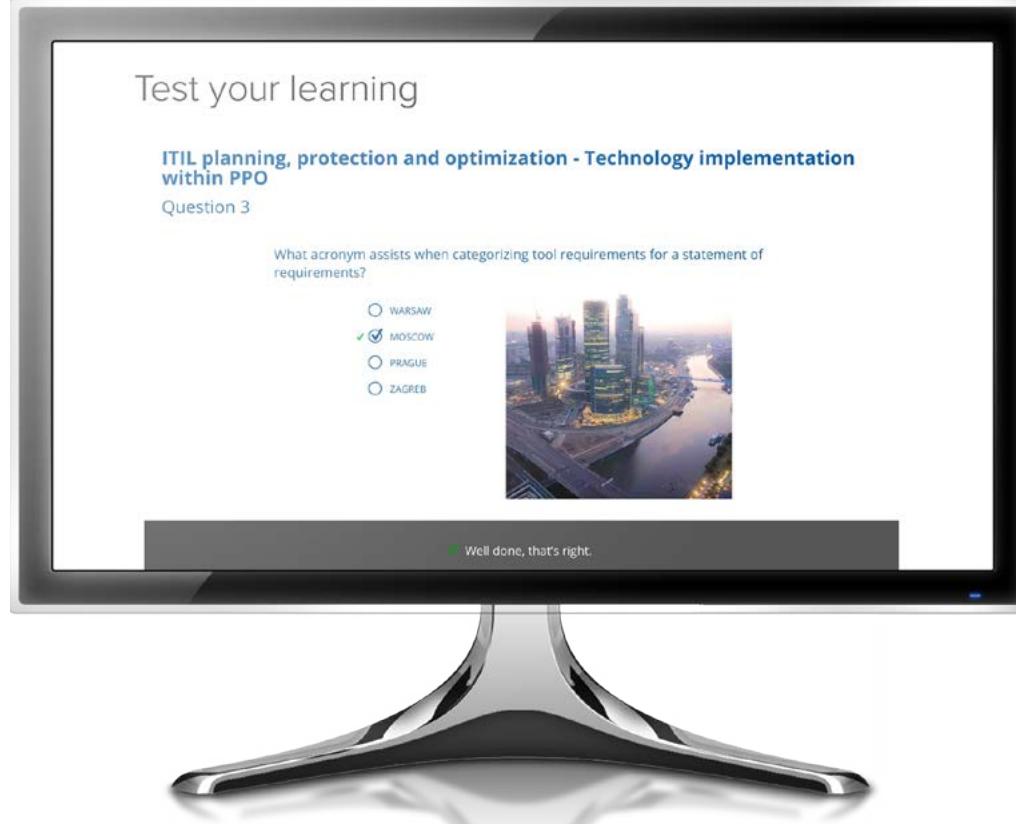

At QA we believe that if you want learning to stick, you need an excellent learning experience from beginning to end.

So our Online Academies have some of the best features available in modern digital learning, ensuring our Customers learn in the most effective way.

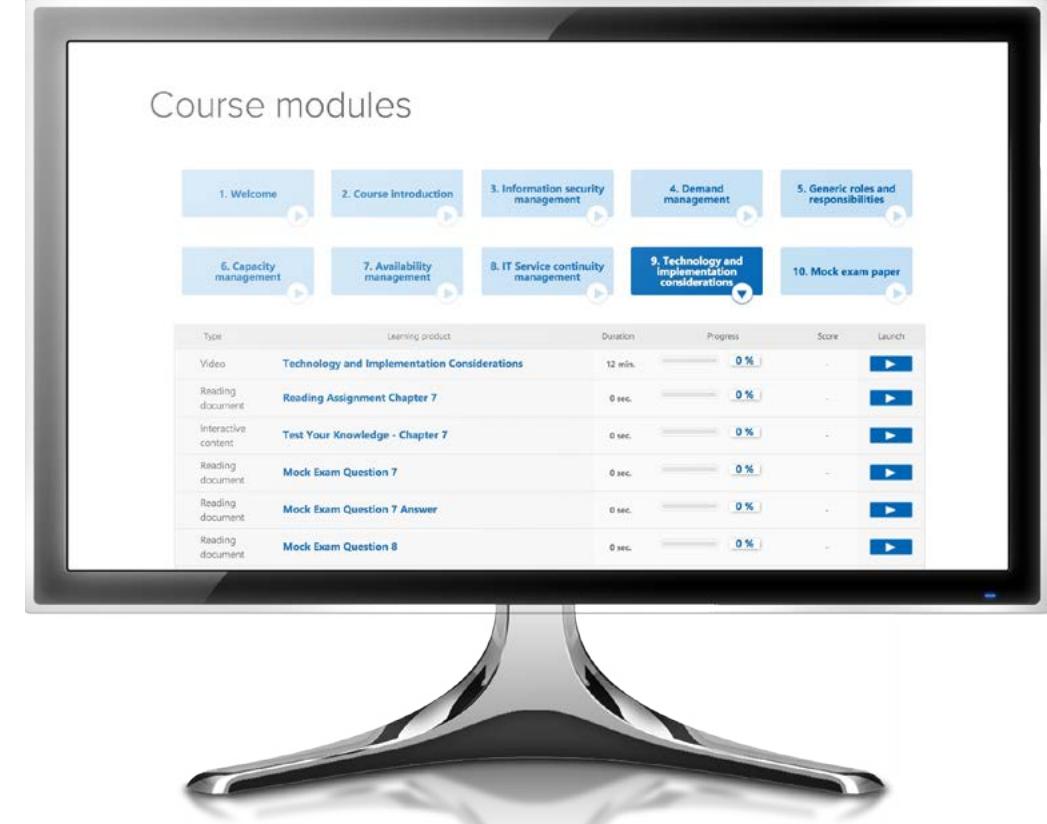

From multi-device mobile access to targeted knowledge checks and activities, we believe in personal learning no matter what the scale.

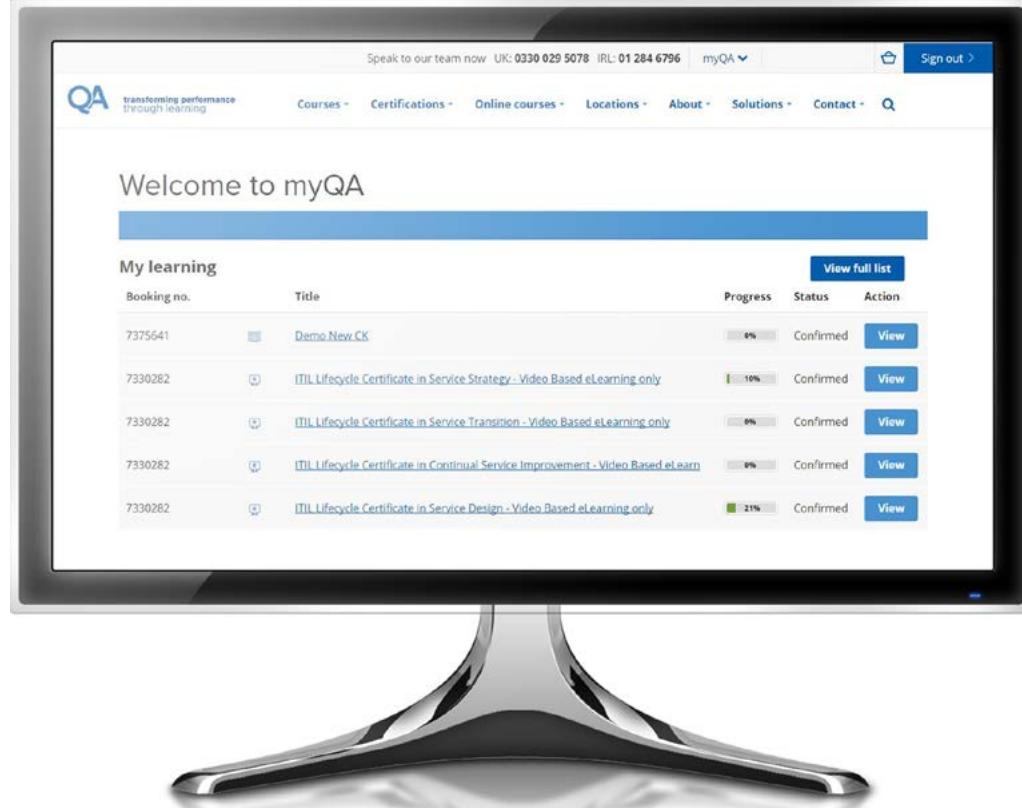

Learn via video and interactive activities.
Our player is usable on all platform and mobile devices.

Interactive tests and activities embed topics and ensure a consistent level of learning.

Courses are broken down into easy-to-use modules and topics, clearly charting learner progress.

Check progress and jump right back to where you left off.

And it doesn't stop there:

Features for learners

Dynamic video player that works across all devices

Learning progress checks: Learners can view their progress at the course level, and also individual learning component

Interactive knowledge tests to embed learning

Discussion boards for peer-to-peer learning.

Assess and Learn: Learners can check their knowledge with the interactive and motivating quizzes and tests with immediate and prescriptive feedback. With scores and results

Mock exams: Exam style assessments questionnaires help learners practice and prepare for exams

Why choose QA's Online Academies?

Digital learning is on the rise, and there are plenty of options out there. So why choose QA's Online Academies?

Unlike most e-learning products on the market, our Academies are designed from the ground up to help the learner achieve an industry-recognised qualification.

The courses are designed and presented by classroom teaching experts, ensuring that every video, every download and every test is perfectly positioned to get the most out of the learning experience.

Our online discussion boards help learners keep their knowledge and skills up to date.

Achieve an industry-recognised qualification.

Courses accredited by leading awarding bodies.

Written and delivered by experienced classroom trainers.

Integrates video, slides, downloads, quizzes and activities to get maximum results.

Continuously updated to reflect latest standards and best practice.

Go beyond qualification and boost your development with follow-up courses and online content.

Learner-led discussions to share answers and best practice.

Exam style assessments to help practice and prepare for exams.

Tutor support to help with queries and questions about the learning content and exam preparation.

What can you learn?

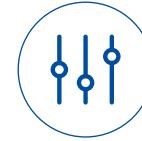

Some courses may be subject to accreditation. See [QA.com](https://qa.com) for full details.
