**WHAT IS
TEACH THE
NATION TO CODE?
A FREE CODING
WORKSHOP
AIMED AT INSPIRING
YOU TO START A
CAREER IN TECH.**

Teach the Nation to Code is a collection of interactive workshops delivered by our industry experts. The content of these sessions has been developed around current UK digital skills shortages, giving you the opportunity to learn entry-level Python skills. We have designed the hands-on workshops in a way that is easy to understand regardless of your background.

Teaching is my real passion; it has changed my life, and I now want to change your life by teaching you how to code.

— Muhammad Shafeeq

Founder

THE WORKSHOPS

We have many workshops taking place around the UK for 2020.

Take a look at the list and drop an email to qac.ttntc@qa.com to find out more.

Event Calendar

Stoke-on-Trent – 25/01/2020

London – 22/02/2020

Leeds – March 2020

Manchester – April 2020

Cardiff – May 2020

Hull – June 2020

Glasgow – July 2020

Liverpool – August 2020

Newcastle – September 2020

Preston – October 2020

London – November 2020

Nottingham – December 2020

Python Basics

This one day course will outline how to install a Python environment and will cover how to create basic Python applications. The workshop will cover:

- Installation & Setup
- Python Conventions and Syntax
- Using operators, conditional statements and loops to create working code
- Introduction to working with data in Python

HOW THIS COURSE CAN HELP YOU

As the world enters further into the information age, skills related to programming have become highly desirable within all industries and many job sectors. Our aim is to give you the confidence and basic knowledge to start learning these skills. By attending one of our Teach the Nation to Code events you'll be able to:

- Get started with Python and understand the basics
- Write your own code and get a number of programs up and running
- Understand logic and further develop your problem-solving skills

THE TRAINERS

Teaching full time at the QA Academy, our trainers have developed a portfolio of workshops aimed at those with little to no knowledge of programming languages and frameworks.

John Gordon

Director of academy and capability

Muhammad Shafeeq

Academy Trainer

Chris Perrins

Academy Trainer
