Network Engineer Level 4

Software Developer Level 4

Cyber Security Technician Level 4

Digital & Technology Solutions Professional Degree Apprenticeship

QA.com

Our Infrastructure Technician Level 3 apprenticeship develops real world skills in the most popular IT technologies.

DISCOVER, PRACTICE AND APPLY

Discover, practice and apply are the three pillars of apprenticeship learning. No matter what part of the apprenticeship a learner is on, discover, practice and apply are combined into each activity.

Discover

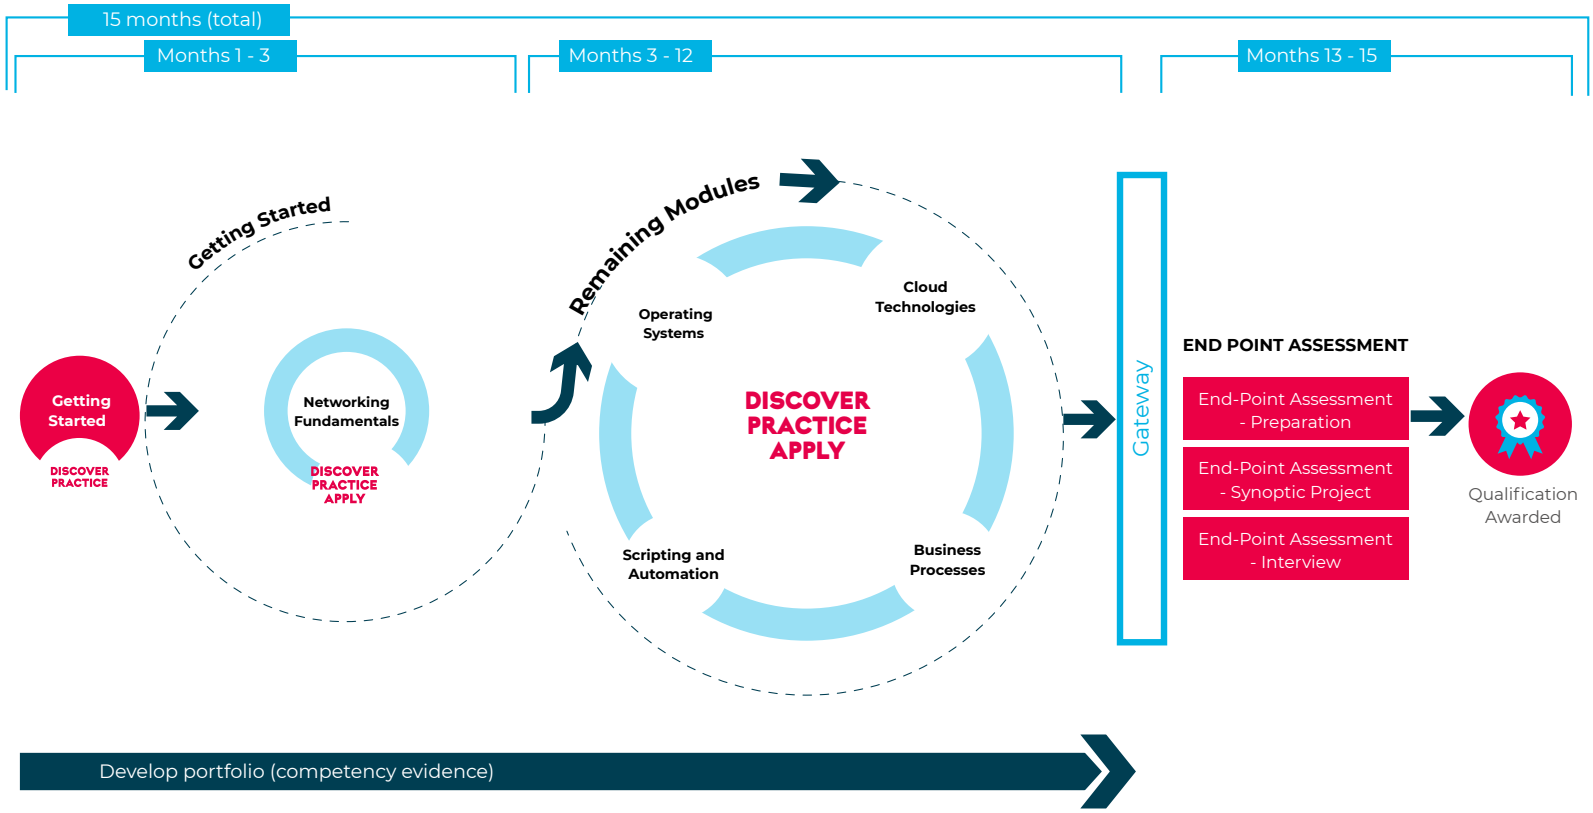
Learners will learn the theory, by exploring subjects online and in the classroom.

Practice

Learners will practise their new-found knowledge by completing activities - online, in the classroom and (most importantly) directly at work in their day-to-day role.

Apply

Learners will apply what they've discovered and practised at work. They will actively contribute to your organisation whilst building their portfolio of evidence (showing how they've applied their new skills) to gain their qualification.



Evidencing 20% off-the-job learning

We are the apprenticeship experts and can help advise you on how best to do this. Our programme facilitates off-the-job learning, it's been developed with online learning and on-the-job learning, as well as classroom training. This 20% must be done in working hours.
