

DEVOPS ENGINEER **Level 4**

DIGITAL BY DESIGN

DURATION 18 months

JOB ROLES THIS PROGRAMME IS GREAT FOR

DevOps Engineer
Infrastructure Engineer
Platform Engineer
Reliability Engineer
Site Reliability Engineer
Build and Release Engineer
Automation Engineer
Deployment Engineer

QUALIFICATIONS

Level 4 DevOps Engineer

WHO IT'S A GOOD FIT FOR

IT Professionals looking to
specialise
Software Developers
Infrastructure Engineers

QA's programme is an apprenticeship like no other. Delivered through a leading-edge, innovative approach to challenge-based learning. Using online learning, practical exercises, video content, coaching and workshops to enable accelerated and proficient skills development.

DISCOVER, PRACTICE AND APPLY

Discover, practice and apply are the three pillars of apprenticeship learning. No matter what part of the apprenticeship a learner is on, discover, practice and apply are combined into each activity.

Discover

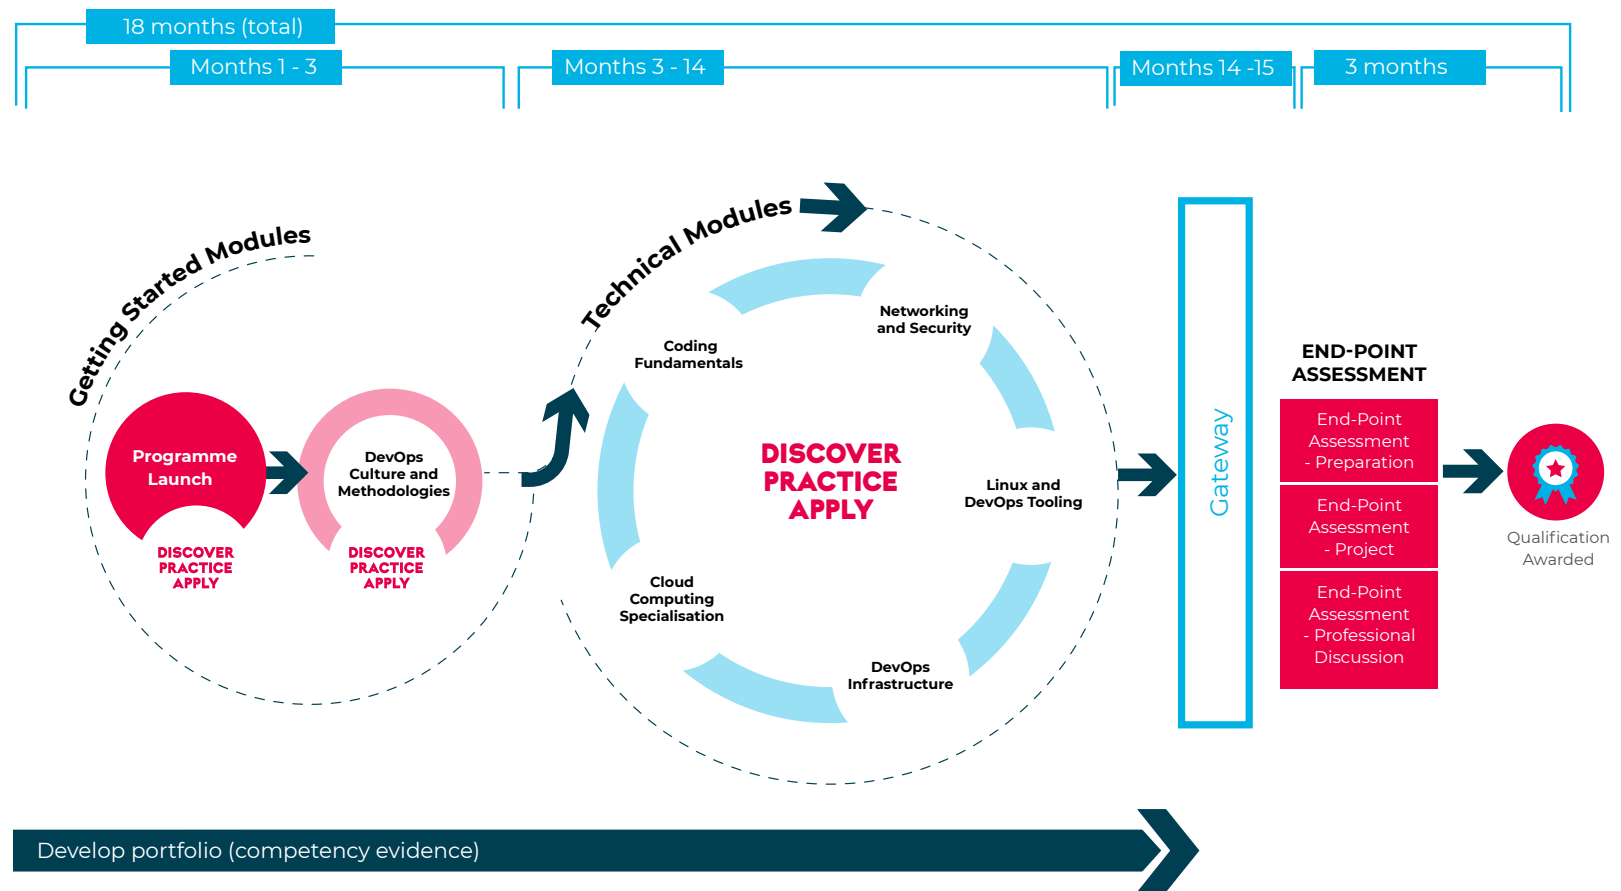

Learners will learn the theory, by exploring subjects online and in the classroom.

Practice

Learners will practise their new-found knowledge by completing activities - online, in the classroom and (most importantly) directly at work in their day-to-day role.

Apply

Learners will apply what they've discovered and practised at work. They will actively contribute to your organisation whilst building their portfolio of evidence (showing how they've applied their new skills) to gain their qualification.

Level 2 functional skills, English and maths must be passed as part of the programme (if not already) and certificates presented, prior to taking the End-Point Assessment. This will be discussed at programme launch.

Evidencing 20% off-the-job learning

We are the apprenticeship experts and can help advise you on how best to do this. Our programme facilitates off-the-job learning, it's been developed with online learning and on-the-job learning, as well as classroom training. This 20% must be done in working hours.
