**based on the Top 100 Apprenticeship Employers 2020

UPSKILL YOUR EMPLOYEES

Working in partnership with universities, colleges and education specialists in the UK, we deliver a range of programmes from foundation level, to undergraduate and postgraduate degrees.

Our level 3-7 apprenticeship programmes equip learners with the learning and development needed to progress their technical careers.

Our leadership programmes are specifically designed to help the learners build the knowledge and skills necessary to become the future strategic leaders of your organisation.

BRING IN NEW TALENT

QA has an extensive attraction and recruiting service targeted at young people interested in and passionate about a career in tech. Our recruitment model includes vigorous AI assessments for candidates to ensure we select apprentices of the highest calibre.

We are passionate about diversity and inclusivity and work closely with organisations to ensure apprentices from all backgrounds are given opportunities, while we're also helping to close the gender gap in tech.

We work with you to ensure the apprentice is a great fit for both the role and your company, and help you choose the apprentice and best programme path.

BUILDING YOUR TECH TALENT PIPELINE

Our programmes, from GCSE to MSc, shape the next generation of technologists, leaders and innovators, and provide your business with the in-demand tech skills you need. **Programmes at-a-glance:**
