

BOOST YOUR DEVOPS DEPARTMENT

WITH AMAZON WEB SERVICES (AWS)
DEVOPS LEVEL 4 APPRENTICESHIP

Are you looking for work-ready DevOps expertise with an understanding of AWS?

The competition for qualified DevOps engineers has never been steeper¹. Our DevOps apprenticeship prepares your learner for the fast-paced world of software development and operations.

As the **#1 UK provider of tech and digital apprenticeships**, we have the expertise and scale to support both small and large businesses with talent solutions.

QA delivers 70% of the UK's cloud training and offers unique and unrivalled access to vendor certifications such as AWS and all other major tech qualifications.

Through our award-winning Digital by Design (DXD) learner support model, **97% of our learners pass on 1st attempt**.

DXD ensures QA apprentices are successful and bring value to your business from day one.

For non-levy paying employers, **we can help businesses explore opportunities to partner with larger organisations** to participate in a levy transfer scheme.

The AWS DevOps Level 4 apprenticeship is an 18-month programme designed to give learners a thorough understanding of theoretical DevOps concepts, solidified with industry-standard tooling education in building, containerising, orchestration and deployment.

1 Apprentices are equipped with comprehensive knowledge of the world of DevOps, and an understanding of the culture of Agile and DevOps.

2 Apply-based activities ensure an apprentice has mastered practical skills through the programme.

3 The programme focuses on Coding and Databases, giving the learner a broader understanding of the development side of DevOps.

 **PROGRAMME DURATION:** 18 Months (14 months practical + four months End-Point Assessment)

This programme is suitable for organisations looking to scale capability in their organisation and is only available for closed cohorts.

ROLES THAT CAN SUPPORT YOUR BUSINESS THROUGH THIS LEVY-FUNDED PROGRAMME:

- DevOps Engineer
- Infrastructure Engineer
- Platform Engineer
- Reliability Engineer
- Site Reliability Engineer
- Build and Release Engineer
- Automation Engineer
- Deployment Engineer
