

UNLOCK YOUR ORGANISATION'S TECHNICAL ABILITY

SOFTWARE ENGINEER
LEVEL 4 APPRENTICESHIP

Gain advance software development skills, and keep digital transformation at the heart of your organisation

With demand for services to be consumed online by both clients and employees increasing exponentially, software developers are in high demand. This programme builds advance skills and technical grounding to design, test and maintain software and web systems. Learners will also receive training and end-to-end software dev stack, as opposed to hyper-focusing on one area of development.

Refresh your organisation with the most up-to-date Software Engineering skill set

A Software Engineer would convert customer requirements into technical requirements, both functional and non-functional to ensure that customers' expectations are accurately reflected in the software products developed.

Increase efficiency and improve performance

Your Software Engineer will be responsible for developing software solutions across the full software development life cycle.

Recognise and act on security requirements

Your Software Engineer would consider security implications of proposed design to ensure that security considerations are build in from inception and throughout the development process.

Bring diversity into your Software Engineering roles

QA's digital apprenticeships can help you access, recruit, reskill, upskill and onboard new diverse junior talent.

A fully funded programme designed to transform your talent and workplace

Software Engineer

Level 4 Apprenticeship

Build the skills and capabilities you need throughout your organisation to deliver flawless network hardware and software, network services and routing protocols.

Upskill or reskill your existing workforce with advance skills and technical grounding to create engineers for the modern day workplace.

Recruit and harness a new talent pathway – QA can help you cost-effectively recruit diverse, ambitious talent into your business and help you build a pipeline of high quality tech engineering talent.

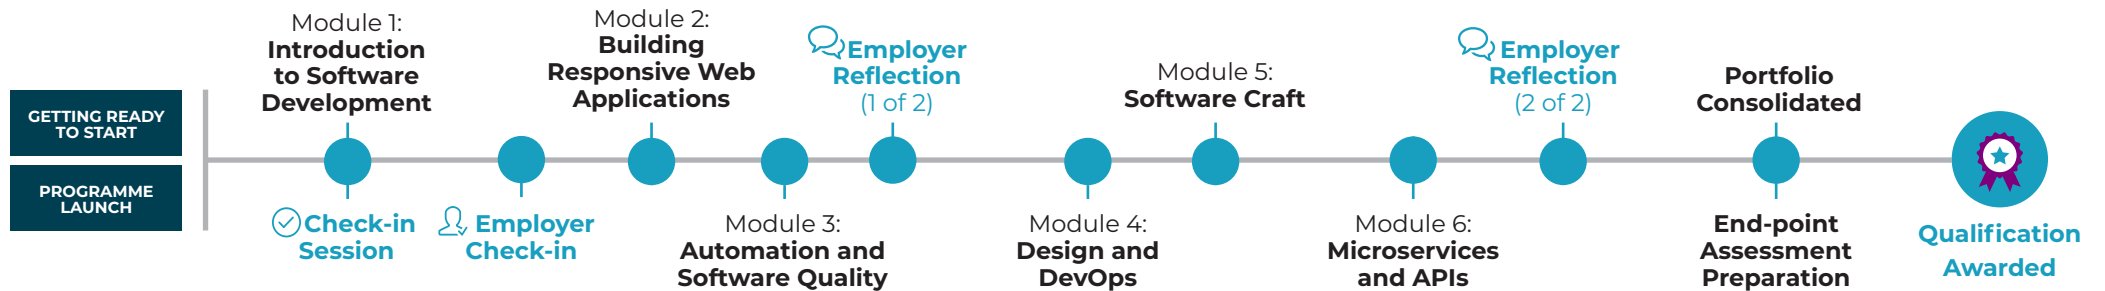

Learners benefit from a flexible and blended learning journey, helping them apply technical software solutions to a range of real-life scenarios – gaining valuable workplace skills faster.

This programme is suitable for roles including:

- Web Developer
- Applications Developer
- Software Developer
- Mobile Applications Developer

Tools & Technologies: Java, Python, HTML, CSS, Microsoft SQL Azure, Office365, C#, JavaScript and Git.

 **Typical Programme Duration: 15 months (+ 4 months for End-Point-Assessment)**
