

Teach The Nation

Introduction to DevOps Workshop

Free, interactive 4 hour sessions

Workshops are available online

Our DevOps workshops are designed to help you discover and enhance your potential in the technology sector, equipping you with the skills necessary to excel and advance in this rapidly evolving field.

Flexible

Our workshops are available online, with some sessions strategically scheduled on weekends making them accessible to everyone, regardless of background or previous knowledge in tech.

Bite-sized

4 hour interactive and engaging sessions carefully crafted to keep you engaged and motivated throughout the training.

CV boosters

Upon completion, you will receive a QA certificate of achievement and badge, the perfect symbols to proudly showcase your newly acquired skills and supercharge your CV and LinkedIn profile.

In tune with technology trends

Our workshops are designed to give you the foundational knowledge to help kickstart your career in tech. We have tailored the workshops to cover the most relevant content for you to stay up to date with the latest tech trends.

Is it for me?

If you are passionate about learning new skills – our workshops are designed for you! These sessions cater to all backgrounds and knowledge levels, so you are likely to find a category that suits you.

Tech enthusiasts

If you're curious about making smarter business decisions, thinking about a career in DevOps, or simply wanting to boost your CV, our workshop is the perfect place for you! We're here to support you every step of the way on your journey.

IT professionals

These sessions are well-suited for professionals seeking to remain informed about the latest developments in DevOps computing. Participants will gain knowledge, elevate their technical capabilities, and enhance their career opportunities within this evolving field.

Software engineers

This interactive workshop is perfect for software engineers who want to make the development and operations process smoother, and improve the presentation of your content, enhancing the user experience.

Operations personnel

This workshop is designed to empower operations teams to embrace collaboration, automation, and innovation, helping your organisation deliver better software faster while maintaining robust and reliable systems.

This hands-on experience focuses on building the skills and knowledge needed to thrive in a DevOps-driven environment.

QA professionals

This workshop will empower QA professionals to drive quality, enhance collaboration with development and operations teams, and contribute to faster, more efficient delivery cycles.

Students and hobbyists

Whether you're a student exploring career options or a hobbyist building passion projects, this workshop is your stepping stone into the exciting world of DevOps!

What will I learn?

Our DevOps workshop is designed to equip you with the essential knowledge and confidence to fully embrace and implement DevOps practices, enabling faster, more reliable, and collaborative software delivery.

Participants will gain practical skills, an understanding of DevOps principles, and the confidence to implement them.

- **DevOps Fundamentals:**
Understand the core principles and cultural shifts that drive DevOps success
- **Build and Optimize CI/CD Pipelines:**
Learn to automate workflows for seamless integration, testing, and deployment
- **Explore Cutting-Edge Tools:**
Get hands-on with industry-leading tools like Docker, Kubernetes, Jenkins, and more
- **Enhance Collaboration:**
Break silos between development and operations for improved productivity
- **Implement Best Practices:**
Gain valuable insights into Infrastructure as Code

When can I attend?

We have many online workshops taking place throughout the year.
