

Network Engineer

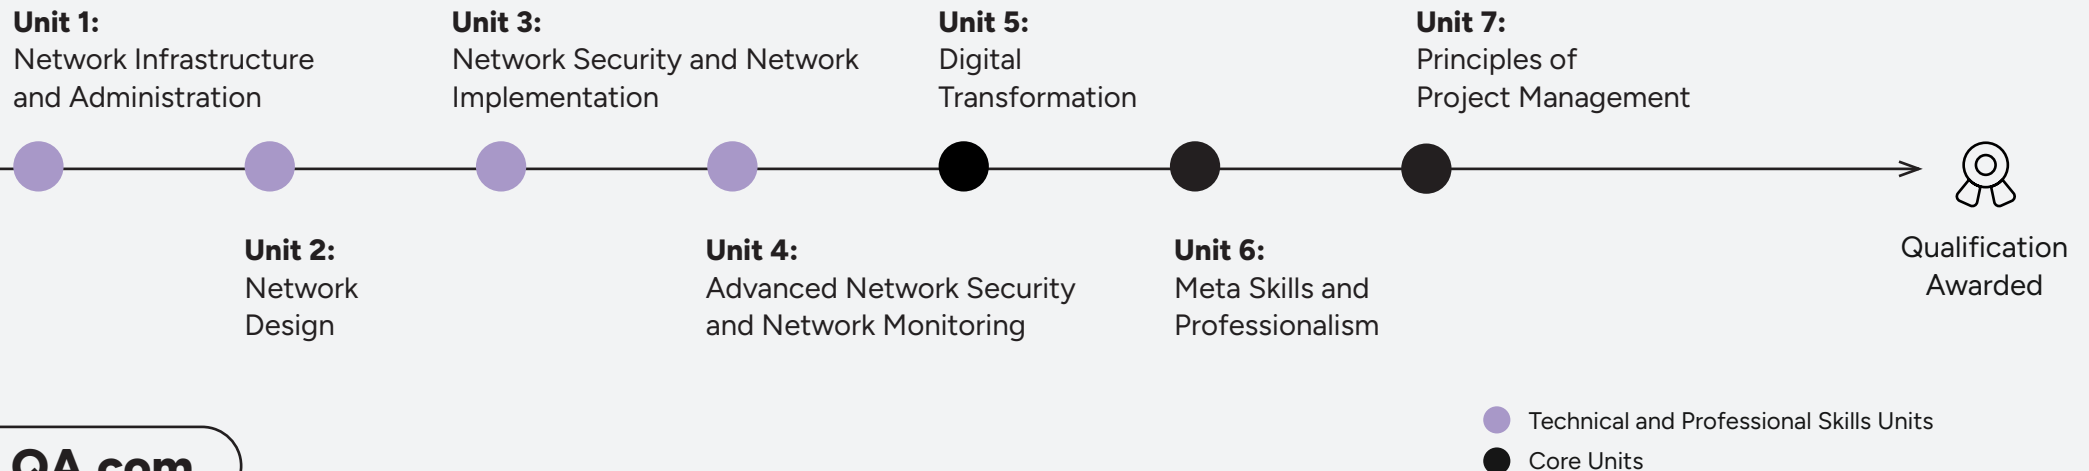

SCQF Level 8

AI Training in every programme

This programme has been designed to teach all the knowledge and performance skills required to successfully design, implement and manage enterprise networks.

For businesses wishing to upskill current employees or hire in and train an apprentice in advanced network practices, this course is the answer.
AI skills training now included in all our apprenticeship programmes.

What's learned: 12-14 month duration

The Programme Advantage

Technical Skills: From networking design principles to security technologies

Soft Skills: Analytical thinking, clear communication, attention to detail

Teamwork: Apprentices learn to work well in a team environment and collaborate with other IT professionals.

What It Brings to Your Business

Cost-Effective Talent: Apprenticeships are a cost-effective way to bring in new talent, which can help manage budget constraints while still getting valuable work done.

Skill Development: Apprenticeships combine on-the-job training with classroom learning. This dual approach helps them develop a well-rounded skill set tailored to your organisation's needs.

Support for Experienced Staff: Apprentices can take on routine tasks and support more experienced staff, allowing them to focus on more complex and strategic projects.

Our Pledge to Your Success

Quality Assurance: We ensure your learners receive the finest training, relevant to the demands of today's business world.

Ongoing Support: Our commitment extends beyond training; we provide a robust support system for both the learner and the employer throughout the qualification journey.

Customisable Programmes: We recognise the uniqueness of your business needs and offer flexible training structures to align with your goals.

"Our apprentice has changed the dynamic within our team and, with a refreshing attitude has brought new life and upbeat energy to the team."

Tom Reid, Information Analyst, Digital, NHS Lanarkshire
