Successful Outcomes from a Private Cloud Architecture

VCF Operations

Fleet Management

- Single Sign-On
- Lifecycle Management
- New workload domains, licenses, configurations, certificate, passwords, and other activities for hosts.

Operations Management

Optimize cost and performance of compute, storage, and networking resources.

Security Management

Security Operations Dashboard provides visibility into platform hardening, governance, and compliance.

VCF Automation

- Self-Service Catalog / Self-Service IaS
- Out-of-the-Box IaS Services
- Core Services (vpx, VCS, Network, Volume, VM Image)
- Extensible Services (e.g., DSM, Control, Harbor)
- Partner-Delivered Services (e.g., Veeam)
- Infrastructure as Code
- Governance and Policies
- Tenant Management
- Content Management
- Orchestration and Extensibility
- Workload Lifecycle Management
- Private AI Automation Services
