

## Success stories

### Your name

Lucy Bryce

### Your apprenticeship programme

QA Digital applications

### About you

I am a motivated and hardworking individual, and I am always eager to learn new things and challenge myself.

### Why did you choose an apprenticeship?

After finding college and university challenging, I decided to try an apprenticeship so that I could learn in an environment that is more suited to my needs as well as grow professionally.

I wanted to challenge myself and gain new opportunities that will help me grow my experience in the world of work.

### How has the apprenticeship enhanced your career?

My Apprenticeship has given me very rewarding opportunities within my workplace. It has not only improved my confidence and knowledge in different IT sectors but helped me earn my new office manager job role.

### What did your apprenticeship mean to you?

To be honest I wanted to gain more knowledge around day to day computer usage. I wanted to learn while working at my own pace and within my personal working schedule.

### What was the biggest challenge you faced and how did you overcome it?

The first couple of weeks it took time to get used the way each module works. I initially felt overwhelmed and worried about the required expectations. But I received great support from my personal tutor and the tutor assigned to each module who quickly reassured me about the requirements.

### What advice would you give to an existing or prospective apprentice?

I would say if you are looking to broaden your horizons then choose this course!
